

Meeting with the City of Jordan  
July 29, 2026

Present: Ted Kornder, Les Quatmann, Ron Symanitz, Ramona Bischof and Amy Mullen  
And Engineer Matt Stordahl

Present from  
City: Travis Fremming, Tom Nikunen, Jeremy Goebel, Robert Whipps

Tom passed out a packet of information for the board to review the city. It was the current OAA and then some maps with future plans. Talked about extending the trail system on County Road 57 from Timberline down to and around the fairgrounds and out to and over Delaware Ave. Have about \$140,000 in trail funds available for this so may be done one section at a time starting on County Road 57 to the fairgrounds and up to the first 3 segments. The city will work on getting a cost estimate. Tom will look at grant programs also.

Tom also said that Hentges came into another concept with regards to the Schmitz pit. There are now 3 separate parcels and the city said they needed to annex one of them in because they are storing stormwater on it and that is city water and should be in the city limits.

Tom also showed us information about the annexations that were completed and how the township has benefited from the annexations that were done with the current OAA.

Went over future plans and proposed growth areas for the City of Jordan and new proposed annexation boundaries that the City is required to detail out fo the Met Council. Much discussion ensued.
